Browser Cache Settings

Open Internet Explorer. Click on Tools in the menu bar. Next, click on Internet Options. You should see:

| Internet Properties ? 🔀 |
|---|
| General Security Privacy Content Connections Programs Advanced |
| Home page |
| To create home page tabs, type each address on its own line. |
| |
| Use <u>gurrent</u> Use <u>blank</u> Use <u>blank</u> |
| Browsing history |
| Delete temporary files, history, cookies, saved passwords, and web form information. |
| Delete Settings |
| Change search defaults. Settings |
| Tabs Change how webpages are displayed in tabs. |
| Appearance Colors Languages Fonts Accessibility |
| OK Cancel Apply |

Click on the "settings" button within the "Browsing history" area of the window. You should see something similar to:

Browser Cache Settings

| Temporary Internet Files and Hist 🔀 |
|---|
| Temporary Internet Files Internet Explorer stores copies of webpages, images, and media for faster viewing later. Check for newer versions of stored pages: <u>Every time I visit the webpage</u> <u>Every time I start Internet Explorer</u> <u>Automatically</u> <u>Disk space to use (8 - 1024MB):</u> (Recommended: 50 - 250MB) Current location: |
| C:\Documents and Settings\mgol\Local Settings\Temporary Internet Files\ Move folder View objects |
| History Specify how many days Internet Explorer should save the list of websites you have visited. Days to keep pages in history: |
| OK Cancel |

Set the disk space to 8 as shown above. Click on OK to return to the previous window. Click on OK again. Close your browser. You are done.
